

EKARUZ

Press Release - 2020 - Endo Odyssey

Endorphin pop, unleashed electro hymns, music for dreamers & awakeners.

Escaping the maze of presumed necessity, taking a single step across the balustrade, where concrete fails to force its way underneath your feet: spread your arms, bounce up and down and feel that honesty in the pit of your stomach. With androgynous vocal color, stroboscopic beats and courage to make a grand gesture, Marius and Nico merge in their songs the leap into the unknown with the confidence to be carried by the updraft.

Two people who became friends in a time when the sound of freedom was a school bell ringing built each other wings of creativity. Their pieces: solar-powered. Their sound: the inhale before the heartbeat, like reentering the earth's atmosphere, freediving— stepping on a stage for the first time.
